

NUMBER TALKS

Number talks are 15-minute exercises that promote mathematical accuracy, efficiency and number flexibility. The Common Core standards state that students must be “fluent” with their math facts. Students must have good number sense to become fluent with math facts. Number Talks allow students to make sense of their learning. It also promotes classroom discourse. Number Talks can be a whole group and/or small group strategy. Participants will participate in a number talk and learn how to start them in their classroom or in their Title 1 support class.
